### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22-24 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 6,034,378 to Shiraishi. See Figure 6 which shows multiple lasers of different wavelength. The different beams are with optical systems 14, 16, and 18 and are aligned on the workpiece coaxially. Figure 6 also shows a wafer W on a movable wafer stage. The specification describes excimer lasers.

### Allowable Subject Matter

Claims 1-21 are allowable over the prior art.

Claims 25 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tsukihara et al describe a beam irradiator device.
